

Information Nominee set

Details

You are receiving this letter as a shareholder in Smart Wires Technology Ltd. In the event you would like to hold and trade Swedish Depository Receipts ("SDRs") on the Nasdaq First North Growth Market, Smart Wires has decided to engage external expertise to assist with this process:

- Sanne Group - Will provide custody and nominee services for Smart Wires shareholders. They will hold your SDRs, execute sales orders in the market, and distribute proceeds to you.
- Optio Incentives - A software company that will administer your shares and will be responsible for communication between all parties. You will get access to the Optio Portal where you find information regarding your holdings.

Sanne account

You need to set up a nominee account with Sanne for them to act on your behalf and hold your SDRs.

Optio Portal

The Optio portal will provide you with:

- Information about your holdings
- History of purchases and sales
- Real-time value of your holdings
- Overview of your documents

Information of sale process

There will be several sales windows each year where you have the opportunity to sell your Smart Wires shares. You will be informed prior to each window regarding details about the sales window; when it will be, for how long, and how to register a sales order. Your election to sell will be held until the end of the sale window. You may cancel your order while the sale window is open.

When the sales window is closed, Sanne will sell the shares in the market and the Optio portal will be updated accordingly. The funds will then be transferred from Sanne directly to your nominated bank account.

Step-by-step participants guide

01

You receive an E-mail

Follow the simple steps to access the Optio portal
